A LEARNING MANAGEMENT SYSTEM WITH A CYBER SECURITY FOCUS

LEARNCLOUD™ TRAINING & COMPLIANCE PORTAL

LearnCloud™ is a unique and completely-customizable online training and compliance portal which allows you to train your staff in cyber security awareness, and monitor their progress for compliance purposes.

The Learning Management System features a complete compliance tracking and reporting module on training completion and policy acceptance, and it provides the ability to efficiently distribute corporate policies, procedures, documents, and provide timely alerts. LearnCloud™ also facilitates compliance reporting.

The combination of leading-edge cyber security course materials, documents library, policy repository with tracking, *and* the dynamic messaging and alerts function makes this portal like none you've ever seen!

- **Customizable** – Beginning with the URL and login page, you can customize the portal with your institution's branding. Make it look and feel like your own by including your logo and corporate colors.
- **Trackable Policy Acceptance** – Acquire and track signatures of policy acceptance in digital format or in writing, where necessary.
- **Online Document Library** – host all your documents in one accessible and centralized location including manuals, policies, procedures, HR forms, DR and emergency contact lists, etc.
- **Compliance Tracking & Reporting** – by student, policy or course
- **Customizable & Automated Messaging System** – enables you to notify employees of fraud alerts, IT alerts, customer service improvement measures, health and benefit plan updates, or other internal communications or events.
- **It seconds as your own intranet** – the portal can be used for more than just training purposes. It can double as your intranet for document sharing solution.
- **Host your own course material too.**
- **Administration is user-friendly and effortless.**

Flexible packaging options enable you to choose the right mix of resources to meet your training needs and deliver valuable learning resources.

- **Security awareness training is no longer optional. In many cases, it's mandatory but at least, it's essential to doing business today.**
- **Gaps in awareness and understanding increase risk, consequences and legal liability.**
- **Anyone can accidentally expose sensitive information.**

Reduce risk and protect sensitive information by changing the way your work force thinks about and handles sensitive information.
