Every Login Is a Door. Do You Know Who Has the Keys?

AD & Entra ID IAM Security Assessment

You Can't Secure the Identities You Haven't Audited.
Active Directory and Entra ID sit behind every login, permission, and privileged account in your business. Years of onboarding, offboarding, and quick fixes leave stale access and misconfigurations that quietly pile up — until an attacker, or an auditor, finds them first.

InfoSight's AD & Entra ID IAM Security Assessment gives you a fast, clear picture of where your identity infrastructure is exposed — and a prioritized path to fix it.

WHERE AD & ENTRA ID RISK HIDES

- **Stale Permissions & Access Creep:** Years of onboarding, offboarding, and role changes leave excess privilege scattered across the domain — a ready-made path for lateral movement.
- **Legacy Trusts & Misconfigurations:** Default settings, forgotten trusts, and unresolved AD health issues create quiet openings attackers already know to look for.
- **Hybrid Identity Blind Spots:** AD and Entra ID drift out of sync, leaving gaps between on-prem and cloud identity that nobody owns.
- **Untested Compliance Posture:** Without a real audit, "we think we're compliant" isn't evidence — and won't hold up with regulators or your board.

TURN RISK INTO RESULTS

- **Rapid, Actionable Findings:** A streamlined assessment that surfaces critical AD and Entra ID vulnerabilities fast — no lengthy, disruptive engagement.
- **Clear, Prioritized Reporting:** Comprehensive, easy-to-read reports ranked by risk, so your team knows exactly what to fix first.
- **People & Process, Not Just Tech:** We evaluate the practices behind your AD environment, not just its configuration.
- **Compliance-Ready Evidence:** Documented alignment with industry standards and best practices, ready for auditors and your board.

HOW THE ASSESSMENT WORKS

1 Health Check

We perform a comprehensive security assessment of your Active Directory and Entra ID environment to identify security weaknesses, privilege exposures, identity risks, and configuration issues across your domain(s).

2 Risk Assessment

We go beyond a standard AD health check — uncovering privilege escalation paths, excessive administrative privileges, weak delegation models, stale or orphaned accounts, authentication risks, and identity misconfigurations, then scoring each by real-world impact."

3 Identity Security Maturity Review

We evaluate the overall health and maturity of your identity management practices against industry best practices—not just technical configurations.

4 Reporting & Remediation Tracking

Delivered through Mitigator™, your executive dashboard tracks Overall Identity Risk Score, Top Identity Risks, Critical Findings, Remediation Progress, and Compliance Readiness — so you always know where you stand, not just where you started.

WHY CHOOSE INFOSIGHT

- ✓ **Fast, Accurate Risk Detection:** Purpose-built methodology finds critical AD and Entra ID risks quickly, without disrupting operations.
- ✓ **Proven ROI:** A cost-effective assessment with outsized impact on your security posture.
- ✓ **Executive Reporting That Drives Action:** Clear, jargon-light findings your team and leadership can act on immediately.
- ✓ **Built for Every Organization:** Right-sized for businesses of any size securing Active Directory and Entra ID.

All results are delivered via our Mitigator™ Cyber Risk & Threat Intelligence Platform, with customizable exports for executives, auditors, and regulators.
