Manage Risk Before It Manages You

Enterprise Risk Management

Siloed Risk Data Is Blind Risk Data.
Rapid market shifts, emerging cyber threats, and global supply chain disruptions keep piling up — and staying compliant with GLBA, PCI, HIPAA, NERC, and AWIA adds even more strain. Without a proactive ERM program, most organizations can't see how risks connect, let alone prioritize which ones to fix first.

Where Risk Hides in Plain Sight

- **Regulatory Complexity:** Keeping pace with GLBA, PCI, HIPAA, NERC, and others, strains teams already stretched thin.
- **Expanding Cyber Exposure:** Emerging threats multiply faster than most risk programs can track them.
- **Supply Chain Disruption:** Global disruptions ripple through operations in ways most risk registers never capture.
- **Siloed Risk Data:** Without a single view, leadership can't see how risks connect or which ones matter most.

InfoSight's Enterprise Risk Management framework blends risk-based analytics, cybersecurity assessments, and regulatory compliance mapping into one program — aligned to your strategic objectives and built to scale with your business.

Turn Complexity Into Clarity

- **One Framework, Full Visibility:** Real-time dashboards and KPIs give leadership a single view of risk across the business.
- **Standards-Aligned Deliverables:** A custom ERM framework, risk register, heatmap, and governance roadmap mapped to COSO and ISO 31000.
- **Risk-Aware Culture:** Cross-departmental collaboration turns risk management into everyone's job, not just compliance's
- **Built to Evolve:** Ongoing support keeps your ERM strategy current as strategic, operational, and cyber risks change.

How We Solve It

1. **Risk Identification**
   Enterprise-wide discovery workshops, data aggregation, and scenario analysis uncover hidden threats.

2. **Risk Assessment & Prioritization**
   Quantitative and qualitative analytics, heatmaps, and scoring models rank risks by likelihood and impact.

3. **Risk Response Strategy**
   Tailored mitigation plans covering cybersecurity controls, supply chain resilience, and compliance roadmaps.

4. **Monitoring & Reporting**
   Real-time dashboards and KPIs feed continuous risk monitoring straight to senior leadership.

5. **Integration with Business Processes**
   ERM workflows embed into your existing governance, audit, and decision-making frameworks.

6. **Continuous Improvement**
   We regularly update the framework to address emerging risks and executive feedback.

Why InfoSight

- ✓ **Certified Experts:** CISSP, CISA, CEH, OSCP, AWS, AWWA, and more across our team.
- ✓ **Managed Services, Any Environment:** End-to-end IT/OT support across on-premise, cloud, and hybrid.
- ✓ **Flexible Engagement Models:** 24×7, 8×5, or off-peak coverage to match your budget and risk appetite.
- ✓ **Virtual ISO Programs:** Bridge the gap between IT and OT teams for a cohesive risk culture.

MITIGATOR® CYBER RISK AND THREAT INTELLIGENCE PLATFORM

All results are delivered via our Mitigator™ Cyber Risk & Threat Intelligence Platform, with customizable exports for executives, auditors, and regulators.

Take the next step.

Bring enterprise risk into focus — schedule your ERM consultation today. One follow-up from a security expert, no spam, ever.
