Default Settings Are an Open Door

Microsoft 365 Security Assessment

Your Business Runs on M365. So Do Attackers.
Misconfigured Teams sites, unsecured OneDrive links, over-permissive Azure AD roles, missing MFA, and unchecked guest access all multiply your risk — and default settings leave gaps attackers can exploit within minutes.

InfoSight's Microsoft 365 Security Assessment blends automated scans with expert-led review to harden your tenant, boost your Secure Score, and map every finding to NIST 800-53 and CIS Benchmarks.

WHERE M365 TENANTS GET BREACHED

- **Excessive Azure AD Privileges:** Admin and global user roles are almost always broader than they need to be.
- **Uncontrolled Collaboration:** Public links and guest invites spread access far past where anyone's tracking it.
- **Weak Email Protections:** Missing DKIM/SPF policies leave clear phishing gaps wide open.
- **Shadow IT Sprawl:** Unsanctioned apps quietly bypass every control you've put in place.

TURN DEFAULTS INTO DEFENSE

- **Comprehensive Risk Report:** Prioritized findings with business-impact scoring and ticket-ready remediation tasks.
- **Secure Score Improvement Plan:** A customized roadmap to boost your Secure Score by 20%+.
- **Audit Trail & Change Log:** Timestamped records of every configuration change for auditor peace of mind.
- **Compliance Mapping:** Findings aligned to NIST 800-53, ISO 27001, HIPAA, and PCI DSS controls.

OUR M365 ASSESSMENT PROCESS

1 Recon & Inventory
Discover every user, mailbox, app, and guest relationship across your tenant.

2 Configuration & Permission Audit
Audit Conditional Access, MFA, Exchange Online, Teams/SharePoint, and API permissions.

3 Threat Simulation & Reporting
Validate exploits, map findings to MITRE ATT&CK and NIST, and deliver an executive-ready remediation roadmap.

WHY CHOOSE INFOSIGHT	
✓ **24×7 U.S. SOC Monitoring:** M365 activity logs feed directly into instant alerting.	✓ **Microsoft Gold Cloud Security Partner:** Direct access to Microsoft's security roadmaps.
✓ **25+ Years of Regulated-Industry Expertise:** GLBA, HIPAA, PCI DSS, NERC, and FedRAMP experience built in.	✓ **SOC 2 Type II-Certified Methodology:** One team covering both cloud and control-system environments.

All results are delivered via our Mitigator™ Cyber Risk & Threat Intelligence Platform, with customizable exports for executives, auditors, and regulators.
