WHY STANDING STILL IS NOT AN OPTION

Cyber attackers don't wait for budgets, hiring cycles, or internal alignment. They exploit every gap—whether that's a missing ISO, outdated policies, or untested controls. Meanwhile, ISO and CISO salaries are climbing, talent is scarce, and most organizations can't sustain the depth of expertise required.

Leaders feel paralyzed between overspending on full-time roles or gambling with underprepared teams, and both paths create unacceptable risk.

vISS: Virtual CISO & ISO Services Delivered as a Cohesive Cybersecurity Program

InfoSight's Virtual Information Security Services (VISS) deliver certified, board-level expertise on demand. Unlike traditional consulting engagements, VISS embeds into your organization as an extension of your executive, IT, and operations teams—providing oversight, direction, and measurable cybersecurity outcomes at a fraction of the cost of hiring in-house.

Compliance. Governance. Risk. All Covered with vISS – Virtual CISO & ISO Services, On Demand.

This model ensures organizations gain immediate access to seasoned cybersecurity leadership without the delays, overhead, or knowledge gaps of building the capability internally.

WHY ORGANIZATIONS CHOOSE INFOSIGHT VISS

Speed:

Rapid deployment of expertise—no hiring bottlenecks.

Savings:

Top-tier cybersecurity leadership for a fraction of in-house costs.

Accountability:

Continuous reporting, measurable KPIs, and board-level visibility.

Confidence: Audit-ready documentation mapped to regulatory requirements.

Scalability:

Engagements flex between tactical, strategic, and technical depth as your needs evolve.

Virtual Chief Information Security Officer (vCISO)

Executive Leadership at the Core

- ✓ Full CISO capability without the recruiting struggle or six-figure salary.
- ✓ Direct alignment of security strategy with business priorities, ensuring security is a growth enabler, not just a cost.
- ✓ Board-ready risk and compliance reporting, incident response leadership, and strategic planning.
- ✓ Expertise spanning compliance, operational oversight, vendor management, and budget planning.

A defensible cybersecurity program that satisfies regulators while strengthening resilience against real-world threats.

Executive-level visibility, a defined cybersecurity roadmap, and confidence your program can withstand scrutiny from regulators, auditors, and the board.

Strategic Virtual Information Security Officer (vISO-S)

Governance, Compliance, and Risk Management

- ✓ Continuous validation of controls against frameworks such as NIST CSF, FFIEC, HIPAA, ISO 27001, PCI DSS.
- ✓ Establishes KPIs and KRIs to measure effectiveness, so executives see progress—not just activity.
- ✓ Oversight of policies, procedures, and training to ensure long-term maturity.
- ✓ Evaluation, reporting, and management of cyber risks.
- ✓ Support for audits, exams, and vendor due diligence.

Tactical Virtual Information Security Officer (vISO-T)

Focused Oversight and Daily Assurance

- ✓ Advisory role targeting operational execution of policies and monitoring.
- ✓ Reviews reports from SIEM, EDR, vulnerability scans, and access controls.
- ✓ Provides monthly and quarterly security summaries to maintain accountability.
- ✓ Bridges the gap between IT staff and executive expectations.

Cybersecurity assurance without overwhelming staff—ensuring gaps are spotted early and reported clearly.

Tactical muscle and technical execution that turn strategy into operational resilience.

Virtual Information Security Expert (vISE)

Hands-On Defense and Technical Depth

- ✓ Real-time monitoring of SIEM/EDR alerts and threat intelligence feeds.
- ✓ Incident response leadership: containment, recovery, and forensic support.
- ✓ Advanced testing: penetration, vulnerability scanning, configuration hardening, Zero Trust implementation.
- ✓ Security awareness training and phishing simulations to reduce human risk.
